

## ITALIAN MACHINE TOOLS, ROBOTICS & AUTOMATION INDUSTRY - NEWS

July 2017

Piattaforma India project

Newsletter No.17

Metal cutting and metal forming machines, robots, automation, digital manufacturing, auxiliary technologies, enabling technologies.

### SEVENTH AXIS BY ROLLON: INCREASE A ROBOT'S RANGE OF MOTION

The Italian company ROLLON has designed its "Seventh Axis" system to increase the range of action of anthropomorphic robots. This product is a sign of further confirmation of the company's on-going transformation: from mechanical component producer to provider of integrated systems and solutions for industrial automation.

### ELECTRICAL UPSETTER FOR TITANIUM VALVES

ER 25 is an electrical-upsetter moved by brushless motors. The machine pre-form bars ready for forging, to obtain thermal motor valves or truck tyres valves.

In this unit, the hammer and the anvil are driven by brushless motors. Nowadays by this characteristic is possible to monitor and adjust the upsetting force and speed with the maximal precision, up to 0.003mm on the diameter of the valve after forging.

The result is the perfect execution even with special materials such as titanium and his alloys.

The project **Piattaforma India** has been promoted by UCIMU – Association of Italian Machine Tools Manufacturers and AMAPLAST –Italian Plastics and Rubber Processing Machinery and Moulds Manufacturers Association. The two associations agreed on the idea that promoting a network of associations and entrepreneurs who have developed knowledge and experience on the Indian market, can be useful in favoring of new paths of development for business. The Indian companies who are interested to form JV, cooperation, technical tie up, purchase machinery etc from/with Italian companies can contact below mentioned address for any assistance.
